

# the KiwiGreenPak mission

---

KiwiGreenPak is committed to contributing to the preservation of the environment.

Our products will meet the demand of consumers who require the same convenience and affordability of disposable food and related packaging without compromise to looks, feel and function.

When selecting our products, they will be carefully reviewed to ensure they meet strict environmental standards. We are determined to provide products that are sourced from renewable resources and decompose back to a natural state without harm to the environment. Alternatively, products should be recyclable, re-usable or re-engineered to use environmentally friendly materials or minimise the amount of material used.

All products are sourced from factories following internationally accepted health, safety and employment standards.

---

KiwiGreenPak products are available from distributors throughout the country who are also committed to providing products that replace existing non-environmentally friendly products.

Visit our website for more detailed information about our product range and to find a distributor near you.
